

## **Project Summary**

**Topic:** Sports Cards

**Purpose:** The purpose of this website is to display my sports card collection, with four categories, High End, Old School, Rookies, and Fun Cards. My website has an interactive first page, that displays my four sections, as well as a YouTube video for viewers who may not know about the sports card-collecting hobby. Each section displays at least 8 cards, along with the details and a correlating gif. Furthermore, every card display has the ability to show both sides of the card.

**Extras:**

- 1. I used two Iframes on my website, one of which displays a video that is an introduction to card collecting. The second iframe is a short clip of a player, in place of a gif/picture that corresponds to the card.**
- 2. I used transitions on my website, with my first one being on the home page, dropping down some information about sports cards. However, the rest of my transitions are on my sports cards, as they make it so I can display both sides of the cards. Whenever you hover over my cards, it transitions to the back side of the card.**
